PROFESSIONAL SUMMARY

Automation Developer with experience delivering end-to-end RPA and business workflow solutions using Microsoft Power Automate Cloud and Desktop, AI Builder, Python, SQL Server, SharePoint, Excel, and Microsoft Dynamics 365. Experienced in invoice processing, financial reconciliation, email-to-database automation, and multi-bank workflows. Comfortable using AI-assisted development tools to research, troubleshoot, and accelerate delivery; familiar with Model Context Protocol (MCP) concepts and AI-enabled workflows.

WORK EXPERIENCE

Trufe | RPA Developer | Full-time

Aug 2025 – Present

- Design, develop, deploy, and support automation workflows using Power Automate Cloud and Desktop, Python, Excel, SQL Server, SharePoint, and APIs.
- Build end-to-end workflows for invoice/document extraction, data validation, email handling, financial processing, and cross-application data transfer.
- Implement exception handling, confidence-based review paths, data checks, and error reporting to improve the reliability of business-critical automations.
- Troubleshoot and support unattended desktop automation, including Windows session, Task Scheduler, and runtime issues.

Skyinfo-group | MERN Full Stack Developer

Jun 2025 – Aug 2025

- Built and maintained full-stack web applications using React, Node.js, Express, and MongoDB.
- Developed REST APIs and responsive user interfaces; supported client website delivery, performance improvements, and SEO.

Elevated Labs | Java Intern (Remote)

May 2025 – Jun 2025

- Implemented Java business logic and APIs, integrated MySQL for data persistence, and resolved bugs in client projects.

SELECTED PROJECTS

AI-Powered Invoice Processing & Dynamics 365 Bulk Upload Automation

- Deployed a single end-to-end bot combining Power Automate Cloud, AI Builder, SharePoint, Excel, Power Automate Desktop, and Microsoft Dynamics 365.
- Configured SharePoint invoice intake and AI Builder extraction, then applied confidence-score and missing-field checks to route exceptions for email-based human review.
- Worked on invoice field extraction and validation, company/vendor routing, company-specific output preparation, and standardized bulk-upload Excel generation across five businesses.
- Automated desktop-side processing of the prepared workbook and upload of invoice data into Dynamics 365; supported troubleshooting of file paths, data formats, and flow failures.

Multi-Bank Automation Workflows

- Deployed automation workflows for multiple bank processes, working with bank-specific requirements and variations across systems.
- Worked on processing rules, weekend handling, token-related steps, and exception paths to support different banking workflows.

Cash Flow Reconciliation Automation Bot

- Automated treasury cash-flow processing by extracting transaction data from Excel and calculating opening and closing balances with date-based logic.
- Added validation for missing or inconsistent data and stored processed results in SQL Server to support tracking and auditability.

Email-to-Database Automation Bot

- Built an end-to-end workflow to retrieve emails, download attachments, extract structured data, and write processed information to SQL Server.
- Implemented automated response handling and error reporting to make business-critical email processing more reliable.

Job Portal | Full-Stack Web Application

- Built a job marketplace with JWT authentication, role-based access for users, recruiters, and admins, job listings and filters, recruiter job management, and résumé applications.
- Integrated Razorpay payments and deployed the application using React, Redux Toolkit, Tailwind CSS, Node.js, Express, and MongoDB.

TECHNICAL SKILLS

RPA & Automation: Power Automate Cloud, Power Automate Desktop, RPA, workflow automation, exception handling, unattended automation

AI & AI-Assisted Development: AI Builder, AI-assisted coding/research/troubleshooting, prompt-based workflows, MCP (Model Context Protocol) familiarity

Programming: Python, JavaScript, Java, SQL, PHP

Data & Integration: SQL Server, MongoDB, MySQL, SharePoint, Excel automation, Pandas, OpenPyXL, REST APIs, IMAP/SMTP

Web Development & Tools: React, Redux Toolkit, Node.js, Express.js, Tailwind CSS, HTML, CSS, Git, GitHub, Microsoft Dynamics 365

EDUCATION

B.Tech, Artificial Intelligence & Data Science — Truba Institute of Engineering and Information Technology, Bhopal | 2022–2025

Diploma, Computer Science Engineering — Peoples School of Research and Technology, Bhopal | 2019–2022 | GPA: 7.14

Additional: 150+ LeetCode problems solved | English (Professional), Hindi (Native), Japanese (Conversational)
